

Logging into Dreambox & Lexia on the iPad

Please note: Lexia, Dreambox, and Clever all require a login (using the Clever QR badge) for each session. Seesaw will stay logged into your child's student account between sessions, but if necessary, this process can also be followed for logging into Seesaw as well.

Lexia and Dreambox can both be accessed through the Clever App:

- 1.) Find the Clever badge (QR code) taped to the outside of your iPad supply bag.

** It is recommended that you keep this bag with the QR code easily available for login to Lexia & Dreambox.*

- 2.) Tap the Clever icon on the home screen of the iPad. It will be on the top row of icons.

- 3.) Allow the Clever app to use the camera, then tap on the camera reversal icon at the top right.

- 4.) Hover the camera over the Clever QR code badge until the green check mark appears.

For Dreambox:

Tap on the Dreambox icon to launch the app. This will automatically log your child into the app using their credentials through Clever.

For Lexia:

Tap on the Lexia icon to launch the app. This will automatically log your child into the app using their credentials through Clever. (Please note that Lexia may take a while to load the first time.)

Lexia can ALSO be accessed using Clever through the Lexia App:

- 1.) Tap the Lexia icon on the home screen of the iPad. It will be on the second row of icons.

- 2.) Tap on the dark blue "Log in with Clever" bar at the bottom of the screen.

- 3.) Tap on the Clever badge login on the right of the screen.

- 4.) Hover the camera over the clever badge, and the student will be logged into the Lexia app.

* Dreambox must be logged into using the Clever app and QR code badge (rather than log in through the app directly).
